

Peacefair PZEM-015 0-200V 100A Discharge Impedance Internal Resistance Capacity DC Energy Meter Watt Meter Li-ion Battery Tester

# Multifunction Battery Me

## Screw-Free Installation of 9 Functional Full Vie

<b>Product Type</b>	PZEM-015
<b>Current Range</b>	0-300A (use external shunt, can matched with 50A, 100A, 200A, 300A four kinds of shunt)
<b>Voltage Range</b>	DC 0-200V
	1.Measure all kinds of battery's voltage, discharge current, discharge power, discharge impedance, internal resistance, capacity, dump energy, energy consumption and running

<b>Function</b>	time 2. Store data when power off. 3. Large-screen LCD 4. Backlight function.		
<b>Weight</b>	233g		
<b>Parameter</b>	<b>Test Range</b>	<b>Resulation</b>	<b>Measurement accuracy</b>
Voltage	0-200V. (when the test voltage is <8V, please use the independent power supply mode)	0.01V	1%
Current	0-100A(with 100A shunt)	1mA	1%
Power	0-20000W	0.01W	1%
Impedance	0-1000Ω	0.1Ω	1%
Internal Resistance	0-999mΩ	1mΩ	1%
Capacity	0-1000AH	1mAH	1%
Dump energy	Dump energy is display via the battery symbol, totally 10 grids, every grid present 10% energy		
Accumulate energy consumption	0~9999kWh	1Wh	1%
Running time	0 ~ 999 hour(without load the time will not accumulate)		

# Battery Meter

this meter is mainly used to test all kinds of battery's voltage, discharge current, discharge power, discharge impedance, internal resistance, capacity, SOC, energy, running time, and display the measurement data through LCD screen.

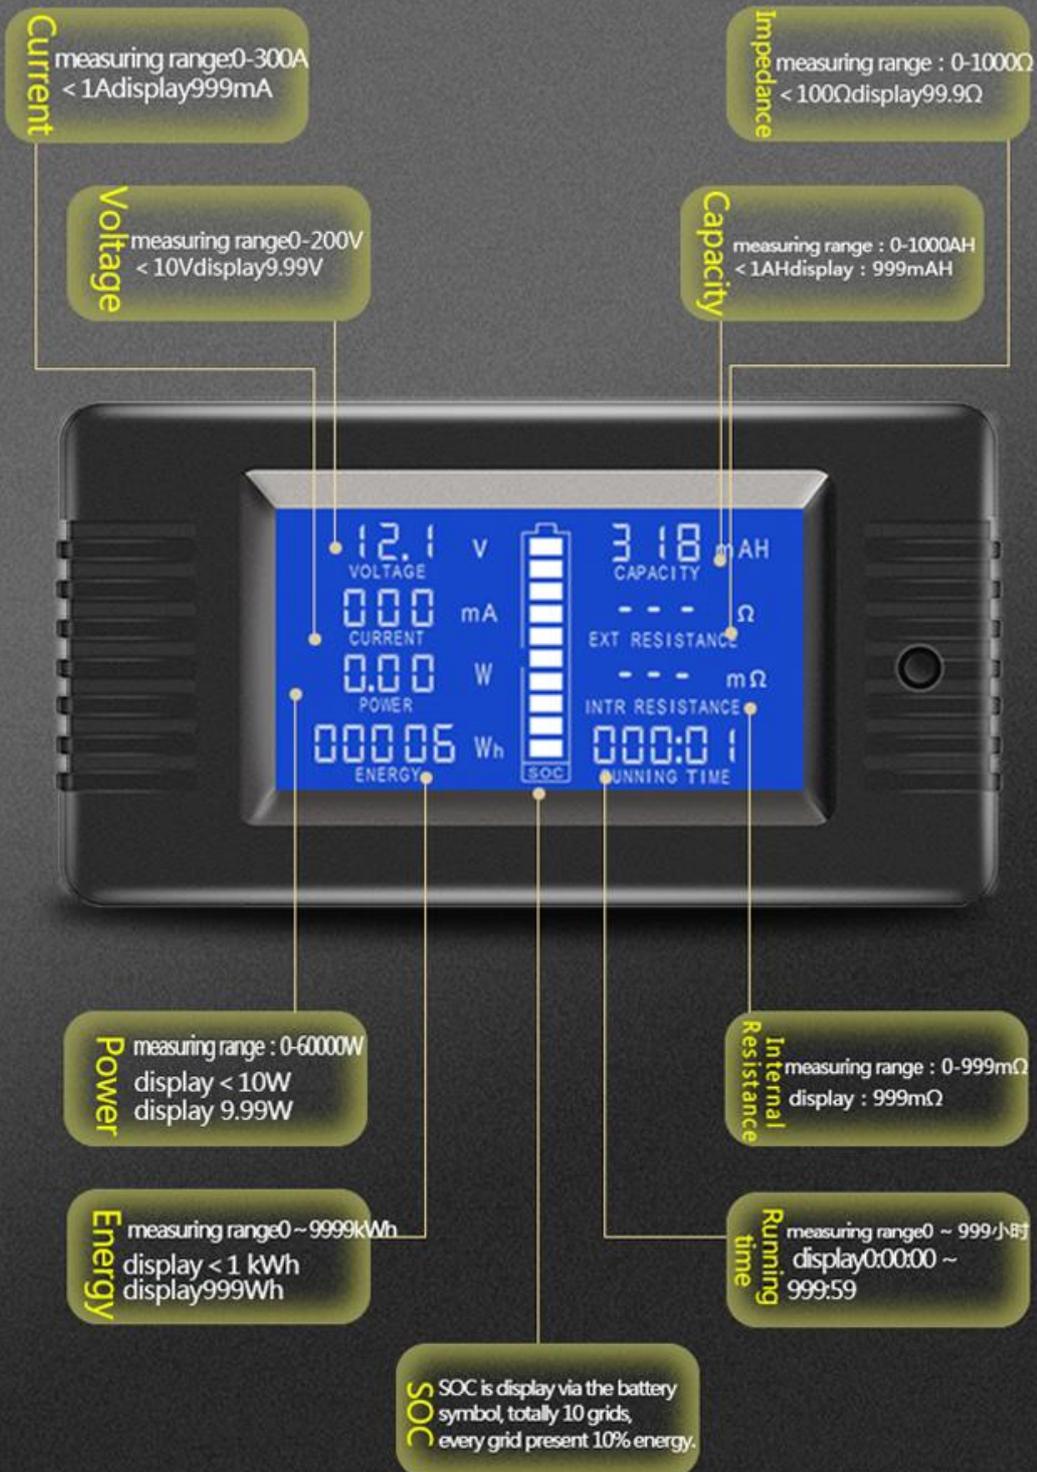

All kinds of data are clear at a glance.

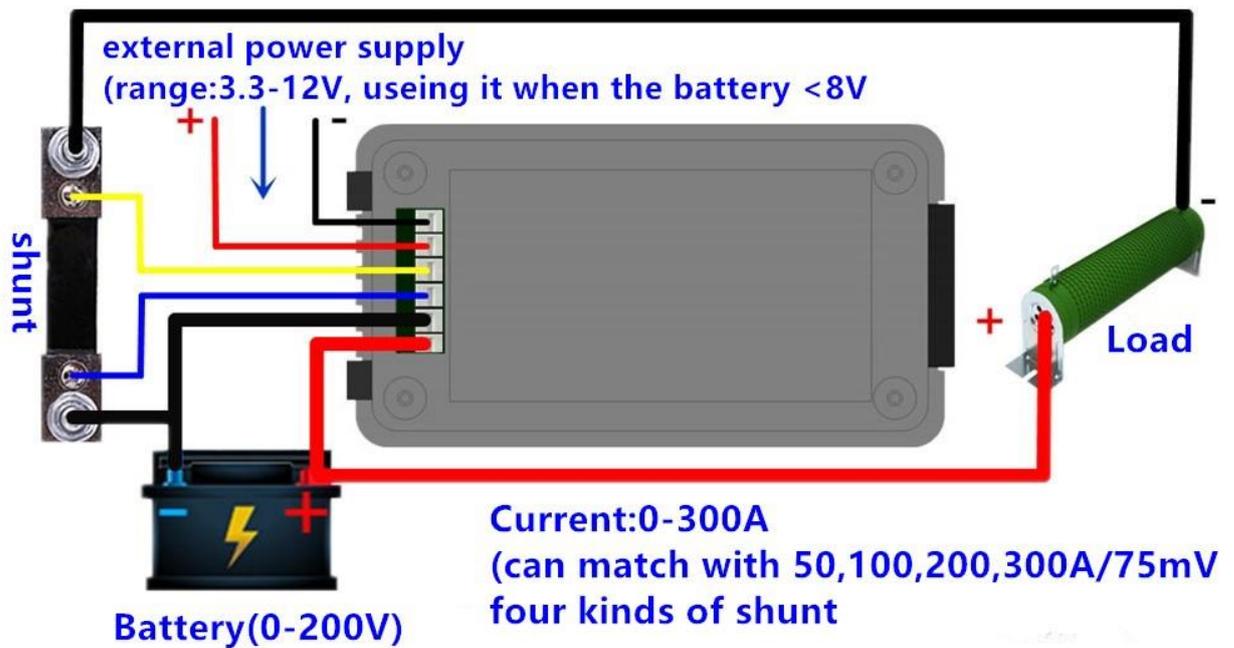

**Data Accuracy** High efficiency and stability

# Introduction of PZEM-015 Display Function

300A range (external shunt can be equipped with 50A, 100A, 200A, 300A four shunts)

### 1. Power consumption

Normal working state: 0.03-1.2 W

Sleeping state: 0.5mW-0.5W

The power consumption is related to the test voltage value, the higher the voltage, the greater the power consumption.

### 2. Working temperature

-20°C ~ +60°C.

### 3. Working mode

This meter has two modes: normal display mode and dormant mode. In normal display mode, short press the button to enter the dormant mode, in order to reduce the whole machine power consumption, the backlight and LCD display will be turned off in dormant mode. In dormant mode, short press the button will switch to the normal display mode.

**Note:** The meter will stop all measurement functions in dormant mode, so please do not switch to dormant mode if normal measurement is performed.
