|------------|------------------|------------------------|----------------|
| STS2DNF30L | 30V              | <0.11Ω                 | 3A             |

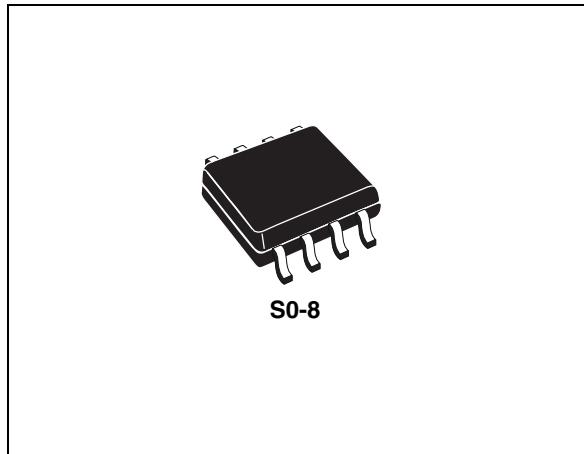

- Standard outline for easy automated surface mount assembly
- Low threshold gate drive

## Application

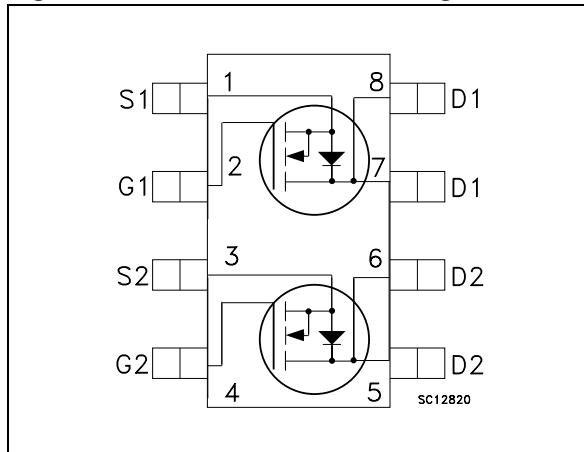

- Switching applications

## Description

This Power MOSFET is the latest development of STMicroelectronics unique "single feature size" strip-based process. The resulting transistor shows extremely high packing density for low on-resistance, rugged avalanche characteristics and less critical alignment steps therefore a remarkable manufacturing reproducibility.
